Portfolio: <https://jhe274.github.io/portfolio-bruce.github.io/>

SKILLS SUMMARY

- **Instrumentation & Electronics:** Laser Optics, Fiber Optics, Solid-State Lasers, Polarimeter, PIDs, cryogenic system, vacuum chamber, Fluxgate/Hall Effect Magnetometer, Lock-in Amplifier, Photoelastic Modulator, Electro-optic Modulator (EOM), RF Signal Generator, RF Amplifier, Spectrum Analyzer, Oscilloscope, Photo Detectors, Optical Chopper, DVMs.
- **Optical Metrology:** Polarization Modulation Ellipsometry, optical alignment, precision optical measurements, interferometry.
- **Languages:** English, Chinese(Mandarin), Python, C++, \LaTeX
- **Software:** COMSOL Multiphysics, MATLAB, Mathematica, Autodesk Inventor, LabVIEW, Microsoft Office
- **Platforms:** Unix based OS (Linux, Mac OS), Microsoft Windows
- **Soft Skills:** Leadership, Effective Time Management, Event Coordination, Technical Writing, Public Speaking & Presentations, Data Analysis, Module Development, Strong Communication & Collaboration, Analytical Reasoning, Problem Solving, Project Management.

PROFESSIONAL EXPERIENCE

- **Graduate Research Assistant** University of Kentucky
Research on sensitive optical magnetometer using resonant Faraday effect *August 2019 - Present*
 - **Optical Metrology:** Expert in polarization modulation ellipsometry. Performed precise optical alignment, system calibration and optimization, utilizing lock-in amplifiers, Muller calculus, and waveform analysis to achieve sub- μ rad accuracy in sensitive optical signal measurements.
 - **Laser Frequency Stabilization:** Extensive experience in spectroscopic laser locking using PDH and DSAS techniques with optical cavities and alkali metals (Rb, K), reducing laser frequency drift to ~ 200 kHz/h – over 110 times more stable than unlocked systems. Implemented sideband locking over 40 GHz using a 6 GHz bandwidth EOM for precise frequency control.
 - **Software Development:** Strong background in scientific programming, developed complete Python package for the wavelength meter, facilitating efficient communication and buffer usage without relying on low-level SCPI commands.
 - **Data Analysis:** Created and implemented multiple Python scripts for comprehensive Faraday rotation data analysis. All scripts and packages are available on GitHub to promote transparency and collaboration in scientific research.
 - **Synchronous Data Acquisition (SDAQ):** Proficient in developing modular Python-based SDAQ systems for communication with scientific instruments such as digital I/O interfaces, wavelength meters, laser controllers, lock-in amplifiers, and Gaussmeters. The system efficiently initializes, configures, and synchronizes instruments, sending TTL-level pulse trigger signals and recording data in their buffers with sub-millisecond time differences.
 - **Merritt Coil Development and Implementation:** Designed and simulated a compact Merritt coil system as a replacement for Helmholtz coils, reducing size by 6x while doubling the longitudinal field gradient and increasing the uniform field range by 33%. Utilized Python and Autodesk Inventor, collaborating closely with machine shop teams to ensure successful implementation.
 - **Compact Magnetic Field Design:** Independently designed and developed a magnet box prototype using COMSOL and MATLAB Simulink, this early career project achieving a 7 G magnetic field with a 20 mG/cm gradient over a 10 cm range. Enhanced expertise in finite element analysis by leveraging concepts such as magnetic scalar potential and image fields.
 - **Cryogenic and Vacuum Systems:** Contributed to system calibration and maintenance of a cryogenic system, gaining hands-on experience with vacuum technologies over five years.
 - **Ongoing Projects:** Machine learning algorithms for real-time magnetic field cancellation, software development for scientific instruments.
- **Summer Research** University of Kentucky
Research on Etch Track-Directed Growth of Carbon Nanotubes on Graphite *May 2018 - August 2018*
- **Graduation Project** Shenzhen University
Research on the Control System of Intelligent Fish Tank Based on Single Chip Microcomputer *September 2015 - May 2016*
- **Open Laboratory Fund Project** Shenzhen University
Research on the Design of Temperature-controlled Automatic Watering Device *September 2012 - October 2013*

TEACHING EXPERIENCE

- **University of Kentucky** Lexington, US
Graduate Teaching Assistant *August 2017 - May 2019*
 - Instructed undergraduate students in Newtonian mechanics, electromagnetism, and physical optics through hands-on lab sessions and interactive recitations, fostering a deeper understanding of core physics concepts.
- **Beijing Dasheng Online Science and Technology Co., Ltd.** Shenzhen, China
Oral English Teacher (Online) *February 2016 - July 2016*
 - As an online English instructor, I taught fundamental communication skills to adult learners, enhancing their oral proficiency.

EDUCATION

- **University of Kentucky** United States
Ph.D. in Physics (Expected Graduation Date: May 2025) August 2019 - Present
Courses: Advanced Mechanics, Quantum Mechanics, Electromagnetic Theory, Statistical Mechanics, Methods of Theoretical Physics, Solid State Physics, Fundamental Particle Physics, Computational Physics.
Focus: Magnetic field design and modeling, electric and magnetic polarizability, light interaction with materials in magnetic field, laser & fiber optics, optical metrology, polarization modulation ellipsometry, optical homodyne detection, atomic spectroscopy, balanced polarimetry, laser frequency stabilization.
- **University of Kentucky** United States
M.S. in Physics August 2017 - May 2019
- **Shenzhen University** China
B.E. in Measurement Control Technology and Instruments September 2010 - July 2017
Thesis: Research on the Control System of Intelligent Fish Tank Based on Single Chip Microcomputer.

PUBLICATIONS

- **Korsch, W., Broering, M., Timsina, A., Leung, K.K., Abney, J., Budker, D., Filippone, B.W., He, J., Kandu, S., McCrea, M. and Roy, M., 2024. Electric charging effects on insulating surfaces in cryogenic liquids.** Review of Scientific Instruments, 95(4).

PRESENTATIONS

In Person

- **J. He, W. Korsch, “Resonant Faraday rotation measurements in a potassium vapor cell.”:** American Physical Society April meeting, Sacramento, April 2024

Poster Presentations

- **J. He, W. Korsch, “Resonant Faraday rotation measurements in a potassium vapor cell.”:** Department of Physics & Astronomy, University of Kentucky, August 2024
Awarded Second Overall Best Poster
- **J. He, W. Korsch, “A compact magnet design to create low-gradient magnetic field in the presence of magnetic shielding.”:** National Nuclear Physics Summer School, Massachusetts Institute of Technology, Cambridge, July 2022
- **J. He, W. Korsch, “A compact magnet design to create low-gradient magnetic field in the presence of magnetic shielding.”:** Department of Physics & Astronomy, University of Kentucky, August 2021

LEADERSHIP & AWARDS

- Graduate Student Congress (GSC) representative of Physics, University of Kentucky August 2023 - August 2024
- Graduate Student Congress (GSC) Conference Award April 2024
- Huffaker Travel Scholarship, Department of Physics & Astronomy, University of Kentucky July 2022, April 2024
- Departmental fellowship for graduate students with an outstanding curriculum August 2017 - May 2019
- Max Steckler Fellowship, Graduate School Fellowship, University of Kentucky August 2018

VOLUNTEERING

- **Raleigh International** Gorkha, Nepal
Venturer July 2016 - August 2016
 - Created a simple webpage using online tools and successfully raised £2000 within two days to support a charity program aiding the earthquake-affected village of Chuwatar, Nepal.
 - Contributed to the construction of sanitary installations, water purification systems, and the laying of water pipelines, including excavating the foundation for a water reservoir to improve local living conditions and ensure a reliable clean water supply.
- **Beijing Youngs Group Public Relation Planning Co., Ltd.** Shenzhen, China
Volunteer Docent, Intel Developer Forum 2015 August 15, 2015 - August 21, 2015
 - Selected as one of the top 10 out of 500 volunteers and recognized as an “Exceptional Volunteer”.
